## Powerwall 3

Rechargeable Solar Battery

Power your home and electric vehicle with renewable energy you control and reduce your reliance on the national grid.

With solar, you typically generate more clean energy than you need. By combining with Powerwall 3, a rechargeable home battery, you can store excess energy from your solar panels for use anytime, even during a power outage.

With easy installation and no maintenance, Powerwall is a completely automated system designed for any home.

Liquid thermal controls, independent fuses and touch-safe technology deliver maximum battery life and added safety.

With an integrated inverter, the all-in-one construction provides one of the most affordable home battery systems in terms of cost per kWh.

The Powerwall 3 is a scalable solar storage battery system. This means you can connect up to 4 Powerwall 3 batteries to provide increased storage for all your home or business energy needs.

## 24/7 Mobile Monitoring

Control your Powerwall 3 and track energy use in real time

Manage your features and track your excess energy with instant notifications and easy navigation.

Customise your system with performance modes and backup protection during severe weather.

Watch your energy flow in real time and monitor your home's energy independence.

### Specifications

Usable Capacity: 13.5kWh
